SOCOM II

AA9629* M1A Socom II Black, Extended Top Rail

Caliber: 7.62x51mm NATO
(.308WIN)

Springfield Armory® SOCOM rifles are compact, powerful, close-quarter battle rifles. But being chambered for 7.62mm NATO. They still pack plenty of punch to reach out and make that crucial shot at a distance. They feature 16-inch barrels (the shortest allowed for a civilian-owned rifle) made possible by a re-tuned gas system. A proprietary, high-efficiency muzzle brake virtually eliminates muzzle rise, enabling you to stay on target for faster, more accurate follow-up shots. The new Cluster Rail System of the SOCOM II further enhances its versatility by accommodating virtually any optic, light or other accessory designed to fit a standard picatinny rail.

*For California legal models the part number is AA9629CA.
